

EDGESTAR Ice Maker Ice Slideway Replacement

Models

IB450SS, IB450SSP, OIM450SS, KIM450BL

The ice slideway is installed on two pins that pop into wholes on the evaporator bracket.

To replace the slideway, fold it into the down position and use your hand to pry the bracket away from the pins. In the image below you can see the tech holding the slideway with his hand and using his thumb to push the tab away from the pin.

Pop the slideway out of the holes, and push the new one back in.
